**+70°C**

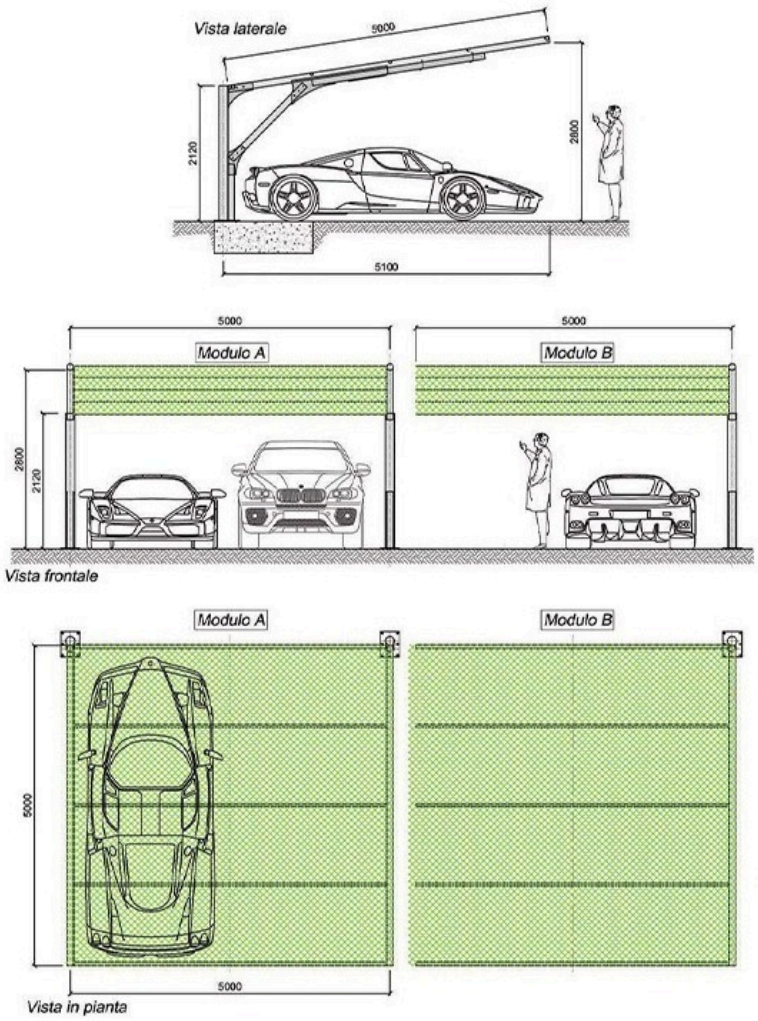

Shading

**Green, Blue and Grey 90%**  
**Green and Black 70%**

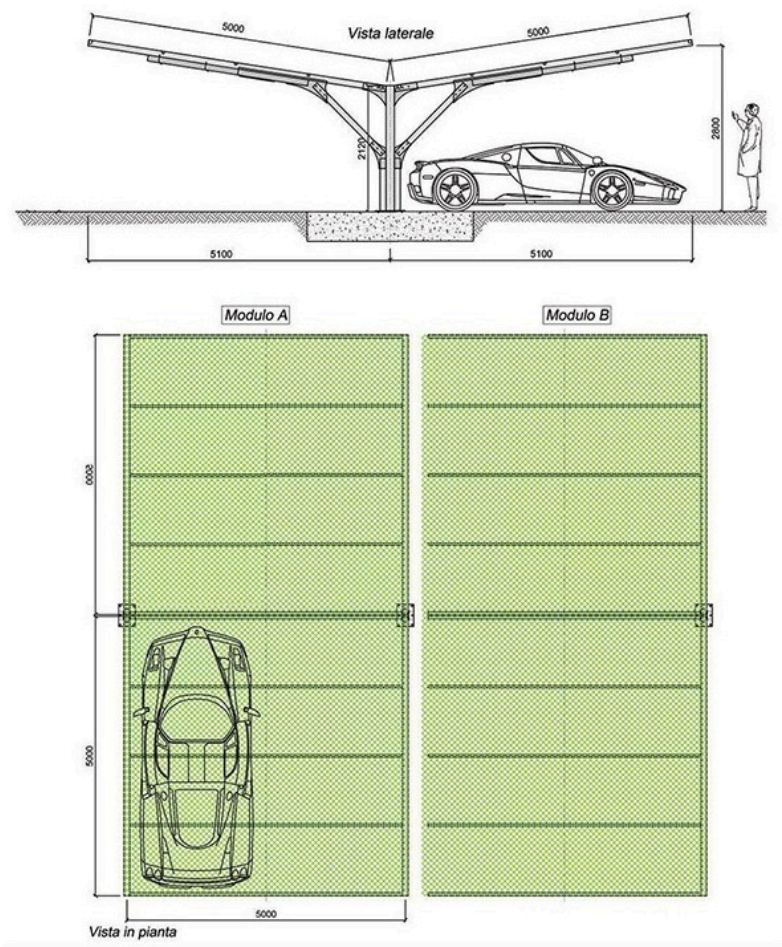

# ParkGO

## SINGLE ONE-SIDED MODEL

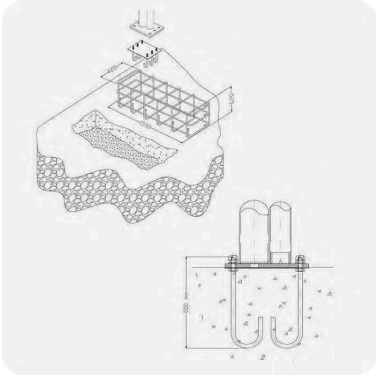

# ParkGO

## DOUBLE TWO-SIDED MODEL

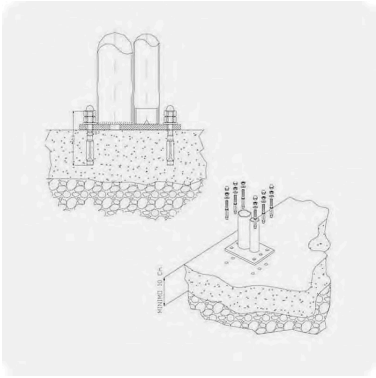

# Structure fixing

## With anchor baskets

The structure is fixed to the ground with anchor baskets set into the reinforced-concrete plinth for stability and safety.

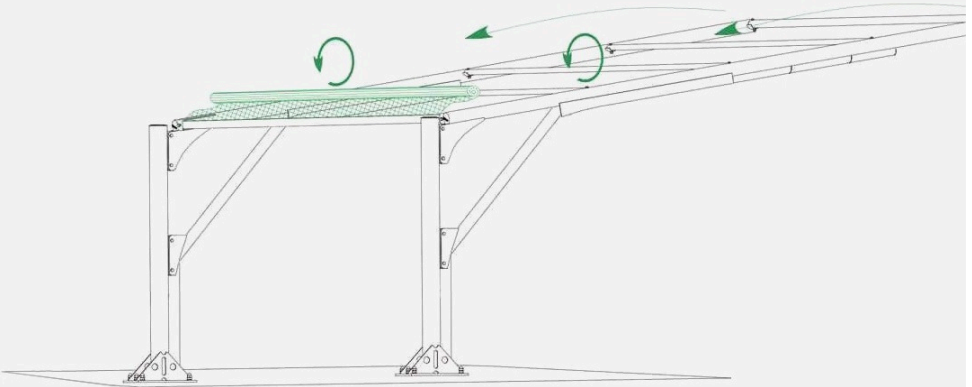

## With expansion anchors

The structure is fixed to the ground with anchors on a suitable reinforced-concrete slab, ensuring solid, lasting support.

# Fabric removal

The fabric of the ParkGO shaded parking must be removed at the end of the summer season. This is necessary because the structure is not designed to bear snow load during winter.
